NEW BRUNSWICK SEED POTATO GROWERS'

CERTIFICATION LIST

1986

Issued by:

Plant Industry Branch

Editor

Alexander Perley

FOREWORD

This booklet lists the varieties certified in New Brunswick during 1986 in alphabetical order indicating the grower, certification class and number and hectares certified.

Inquiries regarding New Brunswick seed may be directed to:--

Secretary-General and Manager
Canadian Seed Potato Export Agency
Suite 102, 191 Prospect Street
Fredericton, N. B. Canada
E3B 2T7
Tel. No. (506) 453-0788

THE NEW BRUNSWICK SEED POTATO INDUSTRY

New Brunswick has a world-wide reputation as a consistent supplier of high quality virus-tested seed potatoes. This reputation has been achieved through the co-ordinated efforts of growers, industry representatives, Provincial and Federal Governments. Working together, they have developed a number of methods and practices which assure a high standard of seed potato quality.

The Bon Accord Elite Seed Potato Farm provides the basic stock to the industry. The Farm is operated by the N. B. Department of Agriculture. It provides over 20 varieties to the New Brunswick growers. Stringent disease control measures and careful management practices are routinely followed. Potatoes produced on the Farm are monitored for potato viruses PVX, PVS, PVA, PLRV, PSTV, and bacterial ring rot. In addition, samples are sent to the Florida winter test each year. This rigorous monitoring assures that only superior quality seed enters the N. B. seed system.

An additional program is being integrated into the production system at Bon Accord. Potato plantlets are produced in test tubes from the small growing tips (meristems) of virus-free plants. These plantlets are then grown in a greenhouse and the tubers they produce are entered into the field production system on the Farm. This meristem plantlet system is presently being introduced. It will provide a means of rapidly bulking new varieties as they are required by the industry.

Foreign delegations tour the Province each year. They visit a number of seed potato growers as well as the Provincial Seed Farm and have an opportunity to gain information on all seed production projects. They observe the high standards maintained throughout the industry and review the management practices followed by seed growers.

One of the visits which receives a lot of attention is the Variety Screening and Multiplication Project. A wide range of varieties or seedlings are maintained at this site. It allows for an early evaluation of the market potential in New Brunswick of new seedlings or varieties and allows seed growers to gain information on production practices prior to introducing a new variety on their farms. It is a co-operative effort of the N. B. Department of Agriculture and the N. B. Seed Potato Growers Association.

The Potato Disease Eradication Act provides the legislative authority to eradicate several named potato diseases from the Province. Any potato production over 1/4 hectare must be grown from Certified or higher class seed. Inspection of growers' premises and disinfection of storage and equipment may be required to assure disease eradication. In addition, the Act provides for the establishment of seed production areas. The Parish of Aberdeen is the first of these areas designated as such by the Glassville Seed Potato Producers' Inc. These growers have agreed to follow rigorous disease control practices. A disinfection unit, vehicle dip and weigh scales are located at the entrance of the community. This facility provides disinfection services for trucks and containers and ensures that seed is packed and transported under sanitary conditions. It ensures that the high quality seed grown in the Glassville area is transported in clean, disinfected vehicles.

New Brunswick seed potato growers generally demonstrate a dedication to high quality production standards. The N. B. Seed Potato Growers Association, formed in 1977, is active in the development and implementation of programs designed to ensure enforcement of disease control and eradication programs. It sponsors seminars and tours on topics of grower interest and administers the Aphid Alert Service and Disinfection Service.

This grower dedication, backed up by strong Provincial and Federal Government commitment, results in the production and delivery of seed potatoes with a high quality standard known around the world.

SEED POTATO CERTIFICATION IN CANADA

Seed Potato Certification in Canada is the responsibility of Agriculture Canada. This results in a uniform system of seed certification for the entire country. The system is described as a Flush Through System. The number of field grown generations is limited to five--Elite I, Elite II, Elite III, Foundation and Certified. There is an automatic downward movement of seed, one class each year. At the end of the years the seed has moved out of the Certification System.

Elite I seed is produced from Pre-Elite tubers. Pre-Elite tubers are tested for bacterial ring rot, potato spindle tuber viroid and the common potato viruses. Provided that no disease is detected, these tubers enter the Certification System as Elite I. Seed passes down through the system each year until it reaches Certified class When Certified seed is planted, it cannot be recertified as seed. The crop produced is used for table or processing.

Elite I and Elite II seed must be inspected at least 3 times with a zero disease tolerance. Elite III seed must have three field inspections with a maximum disease level of 0.25% total blackleg, wilts and viruses. Foundation and Certified seed must have two field inspections with a maximum of 0.25% for Foundation and 2% total blackleg, wilts and viruses for Certified.

Seed potatoes must be graded and sized prior to sale. the size classes are as follows:--

Round Varieties

A Size - 4-12 ounces or 113-340 grams

B Size - 1 1/2-4 ounces or 42-113 grams

Long Varieties

A Size - 4-16 ounces or 113-454 grams

B Size - 1 1/2-4 ounces or 42-113 grams

Contract Size - any size specified by the purchaser

Tubers of all seed classes must meet the Grade standard specified below.

1. Disease or Defect	Percentage
Soft rot or wet breakdown	0.0
Dry rot including late blight	1.0
Scab and Rhizoctonia	
a) slight	10.0
b) moderate	5.0
Stem-end discolouration due to topkilling, frost, heat or drought with penetration from 6 millimeters to 13 millimeters.	4.0

2. No tuber in any lot of seed potatoes shall show symptoms of bacterial ring rot.

3. The percentage of tubers in a lot of seed potatoes of any grade showing symptoms of viruses including leafroll necrosis shall not exceed the percentage permitted by field inspection for all viruses for that grade.

4. The percentage of tubers in a lot of seed potatoes of any grade that are of a variety foreign to the variety of which the lot generally consists shall not exceed the percentage permitted by field inspection for that grade.

5. The number of malformed or externally damaged tubers in any lot of seed potatoes shall not exceed two percent (2%) of the number in the lot.

6. The number of tubers in the aggregate affected by diseases and defects, not including slight scab, slight Rhizoctonia and stem-end discolouration shall not exceed five percent of the total number of tubers in any lot of seed potatoes.

7. All tubers except two percent in any lot of seed potatoes shall be firm and well shaped.

Elite seed classes must be grown on a Provincial Seed Farm or by a selected seed grower. The Province of New Brunswick operates an Elite Seed Potato Farm at Bon Accord. Its purpose is to produce high quality seed for the New Brunswick seed potato industry under the most rigid phytosanitary conditions.

New Brunswick has three classes of seed growers:--

Type of Seed Grower	Class of Seed Produced
25 Elite seed growers	Pre-Elite, Elite I, Elite II Elite III and Foundation
81 Recommended seed growers	Elite III, Foundation and Certified
321 Other seed growers	Foundation and Certified

The Elite and Recommended growers are eligible to receive seed from Bon Accord at the Elite II class. In addition, the Elite seed growers obtain Pre-Elite, eye-indexed tubers, as well as limited quantities of Elite I from Bon Accord to supplement their own production.

To supplement the field inspection program, the Food Production and Inspection Branch, Agriculture Canada requires that seed of all varieties being replanted or offered for sale be Florida tested for the following classes: Elite II, Elite III and Foundation. Seed of the Certified class could also be tested at the request of the grower.

The rigid phytosanitary standards imposed by this Certification System and enforced by the Officers of Food Production and Inspection (F. P. & I.) assure the production of a consistently high quality seed crop.

POTATOES CANADA

Potatoes Canada is an organization representing all segments of the potato industry in New Brunswick and Prince Edward Island. Its primary role is to expand the off-shore exports of seed potatoes and to co-ordinate the efforts of the Federal and Provincial Governments together with the export industry to achieve this objective.

Overseas trials are essential to evaluate variety performance in foreign countries. Through such variety trials, Potatoes Canada attempts to identify and advance varieties both at home and abroad which will satisfy demand and will improve the variety mix which Canada has to offer. Such trials led to the early realization that many markets demanded yellow as well as white fleshed varieties. To fulfil an immediate demand, the Canadian industry was urged to acquire and introduce foreign bred varieties, including American releases, to meet the yellow flesh as well as other market requirements.

Stronger efforts are also being made in the National Breeding Program to fulfil the requirements of the off-shore markets. Yukon Gold is the first Canadian bred yellow fleshed variety to be certified for sale as seed in Canada. Other Canadian bred yellow fleshed seedlings are rapidly being advanced for certification. In addition, efforts are now being made to select varieties adapted for earlier shipping.

Most countries demand that new varieties be tested three to five years before they are licensed for seed importation. Potatoes Canada has entered and promoted new varieties in the commercial level. Varieties successfully licensed to date or varieties near licensing status include Caribe in Cube; Kennebec in Egypt, Tunisia, Libya, Morocco and Hungary; Raritan in Tunisia and Keswick in Greece. Recent Canadian releases such as Acadia Russet, Jemseg, Belleisle, Rideau, Batoche, Shepody, Caribé and Nipigon and being widely tested and promoted.

VARIETY PROFILE - MONONA

Monona is one of the leading chipping varieties both in Canada and the United States and is increasing in popularity in New Brunswick. Monona's adaptability and excellent chipping quality under a variety of climatic, soil and cultural practices have brought the variety to the attention of many chip potato growers.

Bred by Frito-Lay, Inc., Dallas, Texas, it was selected in Maine from a cross of Katahdin selfed by Chippewa selfed. It was released in 1964.

The tubers of Monona are buff in color, oblong to oval with shallow to medium deep eyes with white flesh. Monona has mid-season maturity with medium size spreading plants.

Monona has a medium yield and medium specific gravity. It will produce light colored chips from 42°F storage after being stored for several months. It requires only two weeks of preconditioning after storage at 38°F.

Monona is resistant to Potato Virus Y (rugose mosaic) and to Potato Virus A (mild mosaic) and has good resistance to Verticillium wilt. Monona has good storability with a short dormancy.

Chipping quality, adaptability and disease resistance all combine to make Monona one of the leading chipping varieties in North America.

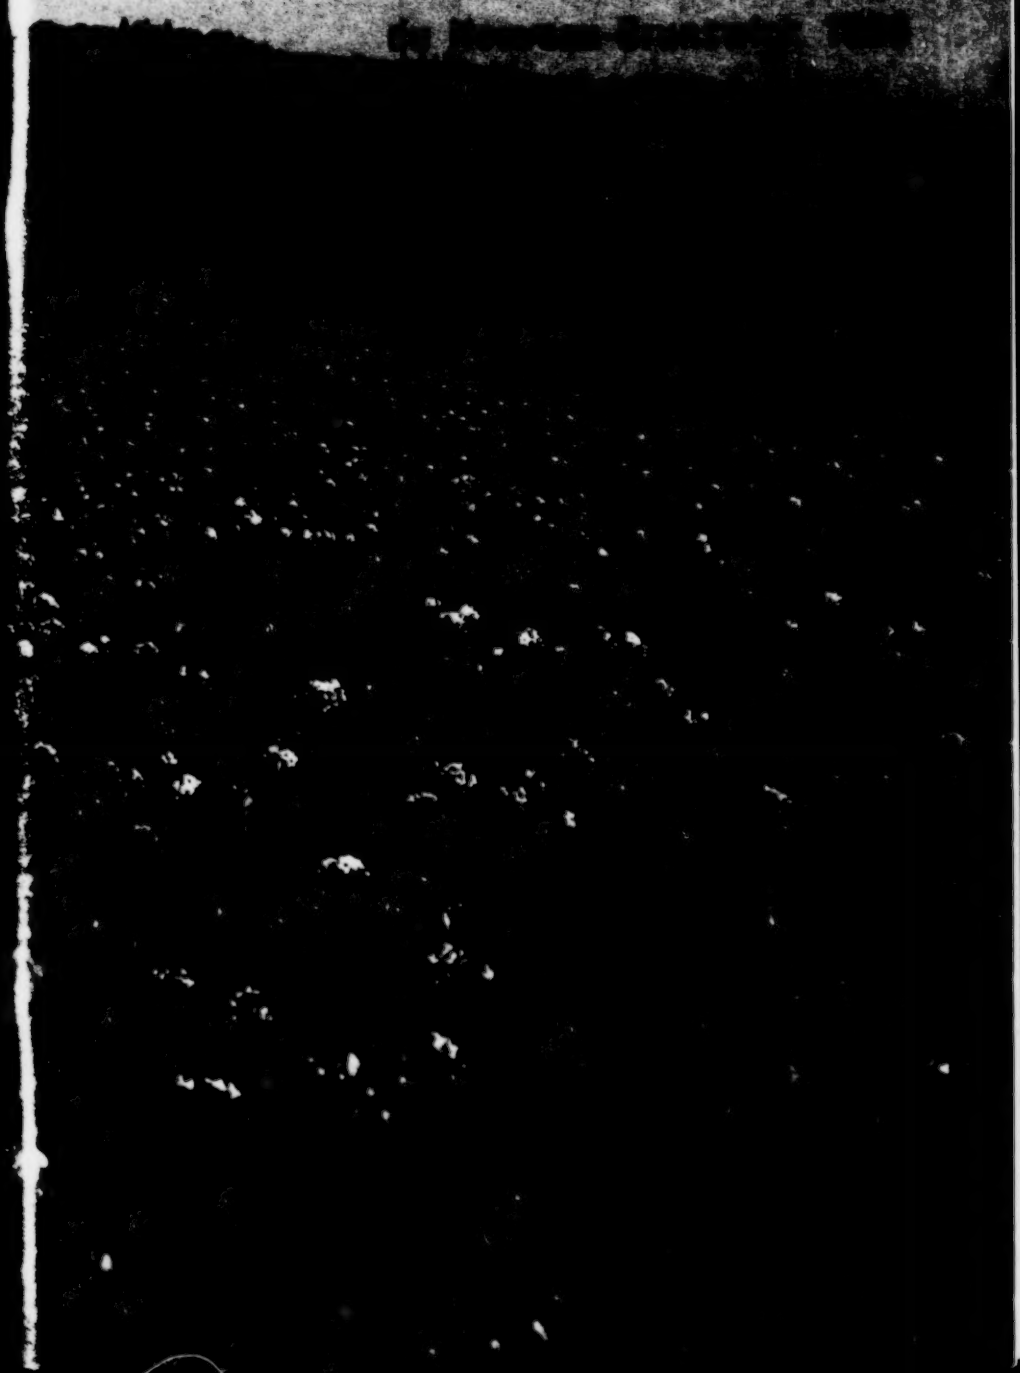
Liste des PRODUCTEURS DE POMMES DE
DE SEMENCE CERTIFIÉS
de Nouveau-Brunswick, 1988



Autorisé par:

l'honorable Hazen E. Myers

Ministre de l'Agriculture

Province du Nouveau-Brunswick

LISTE DES PRODUCTEURS DE POMMES DE TERRE DE SEMENCE CERTIFIEES AU NOUVEAU-BRUNSWICK 1986

Préparé par:

La Direction de l'Industrie Végétale

Alexander Perley

Rédacteur-réviseur

AVANT-PROPOS

Cette publication contient une liste, en ordre alphabétique, des variétés approuvées au Nouveau-Brunswick en 1986 où vous trouverez également le nom du producteur, la catégorie de certification, le numéro du certificat et le nombre d'hectares plantés.

Vous pourrez obtenir des renseignements sur les semences du Nouveau-Brunswick en communiquant avec les personnes indiquées ci-après.

Industrie Néo-Brunswickoise de la Pomme de Terre de Semence

Le Nouveau-Brunswick jouit d'une réputation mondiale comme fournisseur régulier de pommes de terre de semence et de qualité supérieure exemptes de virus. Il a acquis cette réputation grâce aux efforts réunis des producteurs, des représentants de l'industrie ainsi que des gouvernements provincial et fédéral. Ces derniers ont travaillé ensemble à la mise au point d'un certain nombre de méthodes permettant d'assurer un haut statut de qualité pour la pomme de terre de semence.

La Ferme de pommes de terre de semence Elite de Bon Accord fournit les stocks de base à l'industrie. Elle est gérée par le ministère de l'Agriculture du Nouveau-Brunswick et offre aux producteurs de la province plus de vingt variétés. On y applique couramment des mesures sévères de contrôle des maladies ainsi que des méthodes d'exploitation préventives. Les pommes de terre produites sur la ferme sont soumises à des contrôles afin de détecter la présence d'un virus de la pomme de terre (PVX, PVS, PVA, PLRV, et PSTV) ainsi que du flétrissement bactérien. De plus, chaque hiver des échantillons sont envoyés en Floride aux fins d'examen. L'exercice vigilant de ces contrôles permet d'assurer que seules les semences de qualité supérieure sont utilisées dans le système du Nouveau-Brunswick.

Un programme complémentaire est actuellement mis en oeuvre dans le système de production à la ferme de Bon Accord. Des plantules de pommes de terre sont produites dans des éprouvettes à partir des méristèmes de plants exempts de virus. Ces plantules sont ensuite cultivées dans une serre et les tubercules produits passent dans le système de production en culture sur la ferme. On procède actuellement à l'introduction de ce système de plantules provenant de méristèmes. Cette innovation permettra de fournir rapidement les nouvelles variétés en grandes quantités de façon à satisfaire à la demande de l'industrie en temps voulu.

Chaque année, notre province reçoit des délégations étrangères. Celles-ci visitent un certain nombre de producteurs ainsi que la ferme provinciale de pommes de terre de semence. Cela leur donne l'occasion de se renseigner sur tous les projets de production de semences. Elles peuvent aussi se rendre compte des normes sévères appliquées partout et observer les méthodes d'exploitation des producteurs de semences.

Le Projet de multiplication et de sélection des variétés est l'une des visites les plus populaires. Dans le cadre du projet, on plante une grande gamme de variétés, afin d'évaluer à l'avance les possibilités de nouvelles variétés pour le marché du Nouveau-Brunswick et d'informer les producteurs de semences sur les méthodes de production avant qu'ils n'essaient la nouvelle variété sur leur ferme. Le projet est le fruit d'une collaboration entre le ministère de l'Agriculture du Nouveau-Brunswick et de l'Association des producteurs de pommes de terre de semence du N.-B.

La Loi sur l'éradication des maladies des pommes de terre régit la suppression de plusieurs maladies déterminées de la pomme de terre dans la province. Pour toute production dépassant un quart d'hectare, il faut utiliser des semences de catégorie Certifiée ou d'une qualité supérieure. Il se peut qu'une inspection des installations du producteur ainsi qu'une désinfection du matériel et des entrepôts soient nécessaires pour assurer l'éradication des maladies. De plus, la Loi prévoit des dispositions pour d'établissement de secteurs de production de pommes de terre de semence. La Paroisse d'Aberdeen est le premier de ces secteurs désignés par la "Glassville Seed Potato Producers' Inc.". Ces producteurs ont décidé d'appliquer des mesures sévères de lutte contre les maladies. A l'entrée de cette localité, se trouvent une installation de désinfection, un bassin pour les véhicules et des postes de pesée. Ces appareils permettent d'offrir des services de désinfection des camions et des récipients afin d'assurer l'emballage et le transport des semences dans des conditions sanitaires satisfaisantes. Grâce à ces installations, les semences de première qualité produites dans le secteur de Glassville sont transportées dans des véhicules propres et désinfectés.

Les producteurs néo-brunswickois de pommes de terre de semence ont généralement a coeur d'appliquer les normes pour obtenir une production de première qualité. L'Association des producteurs de pommes de terre de semence du N.-B., créée en 1977, s'occupe activement de l'élaboration et de la mise en oeuvre de programmes visant à assurer l'application des contrôles relatifs aux maladies ainsi que des programmes d'éradication. Elle parraine des séminaires et des visites guidées susceptibles d'intéresser les producteurs et elle gère le Service de dépistage des pucerons ainsi que le Service de désinfection.

Ces efforts des producteurs, appuyés par un engagement marqué des gouvernements provincial et fédéral, ont entraîné la production et la livraison de pommes de terre de semence dont la qualité supérieure est reconnue dans le monde entier.

Ceritification des Pommes de Terre de Semence au Canada

Agriculture Canada se charge de la certification des pommes de terre de semence au Canada. Il en résulte un système uniforme de certification des semences pour tout pays qu'on peut décrire comme étant un système de rétrogradation. Le nombre de générations produites en culture se limite à cinq: Elite I, Elite II, Elite III, Fondation, et Certifiée. Chaque année, la semence est rétrogradée d'un rang. Au terme des cinq ans, elle ne fait plus partie du système de certification.

La semence Elite I est produite à partir de tubercules Pré-Elite. On s'assure auparavant que les tubercules Pré-Elite sont exempts du flétrissement bactérien, la filosité des tubercules et des virus communs de la pomme de terre. Une fois ce contrôle effectué, si aucune maladie n'est dépistée, ces tubercules sont introduits dans le système de certification à titre de semence Elite I. Chaque année, la semence est rétorgradée jusqu'à ce qu'elle tombe dans la catégorie Certifiée. Après la plantation d'une semence Certifiée, il n'est plus possible qu'elle soit certifiée à nouveau comme semence et la récolte produite sera destinée à la consommation ou à la transformation.

Les semences Elite II doivent être inspectées au moins trois fois au cours de la croissance; et être déclarées exemptes de maladies. Les semences Elite III doivent être inspectées trois fois au cours de la croissance; et ne pas dépasser le taux de maladie admissible de 0.25 p. 100 pour le total de flétrissures, jambe noire et viroses. Les semences Fondation et Certifiées doivent être inspectées deux fois et ne pas dépasser le taux de maladie admissible de 0.25 p. 100 pour la Fondation et de 2 p. 100 pour la Certifiée en ce qui concerne le total des flétrissures, jambe noire et viroses.

Avant la mise en ventre des pommes de terre de semence, il faut procéder à la détermination de la catégorie (our qualité) et du calibre. Voici les différents calibres:

Variétés rondes

Calibre A - de 4 à 12 onces ou de 113 à 340 grammes

Calibre B - de 1 1/2 à 4 onces ou de 42 à 113 grammes

Variétés longues

Calibre A - de 4 à 16 onces ou de 113 à 454 grammes

Calibre B - de 1 1/2 à 4 onces ou de 42 à 113 grammes

Calibre dans un contrat - tout calibre précisé par l'acheteur.

Les tubercules de toutes les catégories doivent satisfaire aux exigences en ce qui concerne les normes de qualité énoncées ci-après.

1.

Maladie ou défaut	Pourcentage
Pourriture molle ou décomposition suintante	0,1
Pourriture sèche, y compris le mildiou	1,0
Gale et rhozoctonie	
a) légère	10,0
b) modérée	5,0
Jaunissement ombilical dû à la destruction des faunes, au gel, à la chaleur ou à la sécheresse, avec pénétration de 6 à 13 millimètres.	4,0

2. Aucun tubercule dans la parcelle de semence ne doit présenter de symptômes du flétrissement bactérien.

3. Dans une parcelle de pommes de terre de semence de quelque qualité que ce soit, le pourcentage de tubercules ayant des symptômes de virus, y compris la nécrose de l'enroulement, ne doit pas dépasser, pour tous les virus, celui autorisé à chaque inspection en culture de cette qualité de semence.

4. Dans une parcelle de pommes de terre de semence de n'importe quelle qualité, le pourcentage de tubercules étant d'une variété autre que celle cultivée dans la parcelle ne doit pas dépasser celui autorisé pour chaque inspection en culture de cette qualité de semence.

5. Dans toute parcelle de pommes de terre de semence, le nombre de tubercules difformes ou endommagés ne doit pas dépasser 2 p. 100 du nombre de tubercules dans la parcelle.

6. Dans toute parcelle de pommes de terre de semence, le nombre de tubercules touchés dans l'ensemble par des maladies ou des défauts, exception faite de la gale ou rhizoctonie légère et du jaunissement ombilical, ne doit pas dépasser 5 p. 100 du nombre global de tubercules dans cette parcelle.

7. Dans une parcelle de pommes de terre de semence, tous les tubercules doivent être fermes et bien formés, mais un taux d'exception de 2 p. 100 est toléré.

Les semences de catégorie Elite doivent être cultivées sur une ferme provinciale de pommes de terre de semence ou par un producteur autorisé. La province du Nouveau-Brunswick exploite une ferme de pommes de terre de semence Elite à Bon Accord afin de produire des semences de qualité supérieure pour l'industrie de la pomme de terre de semence au Nouveau-Brunswick et ce, dans les meilleures conditions phytosanitaires possibles.

Les producteurs de semence du Nouveau-Brunswick se classent en trois catégories:

Catégorie du producteur	Qualité de semence produite
25 producteurs de semences Elite	Pré-Elite, Elite I, Elite II, Elite II et Fondation
81 producteurs de semences recommandés	Elite III, Fondation et Certifiée
321 autres producteurs de semences	Fondation et Certifiée

Les producteurs Elite et ceux recommandés peuvent obtenir des semences Elite II de la ferme Bon Accord. De plus, les producteurs lite peuvent obtenir de cette ferme des tubercules Pré-Elite indexés ainsi que des quantités limitées de semences Elite I comme supplément à leur production.

Outre le programme d'inspection en culture, la Direction générale de la production et de l'inspection des aliments, d'Agriculture Canada, exige l'épreuve de Floride pour les semences de toutes les variétés qui sont replantées ou mises en vente dans l'une des catégories suivantes: Elite II, Elite III et Fondation. Les semences de la catégorie Certifiée peuvent aussi être soumises à cette épreuve à la demande du producteur.

Dans ce système de certofocatopm. la sévérité des normes phytosanitaires appliquées par les agents de la Production et de l'inspection des aliments permet d'assurer une récolte constante de semences de première qualité.

POMMES DE TERRE CANADA

Pommes de terre Canada représente tous les secteurs de l'industrie de la pomme de terre au Nouveau-Brunswick et à l'Ile-du-Prince-Edouard. Le rôle principal de cet organisme consiste à favoriser l'expansion des exportations de pommes de terre de semence au-delà des mers et à coordonner les efforts consacrés à la réalisation de cet objectif à la fois par les gouvernements fédéral et provincial ainsi que l'industrie de l'exportation.

Les essais outre-mer sont essentiels à l'évaluation du rendement d'une variété dans des pays étrangers. Au moyen de ces essais, Pommes de terre Canada s'efforce de découvrir et de promouvoir des variétés qui satisferont à la demande au Canada et à l'étranger, et permettront d'améliorer le choix des variétés offertes par le Canada. En procédant à ces essais, l'organisme s'est très vite rendu compte qu'un grand nombre de marchés exigeaient des variétés à chair jaune en plus de celles à chair blanche. Afin de satisfaire à la demande immédiate, l'industrie canadienne a dû acquérir et offrir des variétés de provenance étrangère, y compris certaines des Etats-Unis, de façon à répondre aux besoins en variétés à chair jaune ainsi qu'aux autres exigences des marchés.

Par ailleurs, grâce au Programme d'amélioration de la pomme de terre, de plus grands efforts sont déployés en vue de satisfaire aux exigences des marchés au-delà des mers. La Yukon Gold est la première variété canadienne à chair jaune approvée pour la vente au Canada à titre de pomme de terre de semence. D'autres variétés canadiennes à chair jaune sont assez rapidement lancées aux fond d'introduction dans le système de certification. De plus, on essaie actuellement de choisir des variétés qui conviendraient pour la production de petities semences entières et d'autres qui seraient adaptées pour une expédition avancée.

La plupart des pays exigent que les nouvelles variétés soient mises à l'épreuve pendant trois à cinq ans avant de délivrer un permis aux fond d'importation de semences. Pommes de terre Canada s'est occupé du lancement et de la promotion de nouvelles variétés pour les essais initiaux d'adaptation, les programmes nationaux ainsi que le commerce en générale. Voici les variétés approuvées jusqu'à présent, ou qui le seront bientôt: Caribé au Cuba; Kennebec en Egypte, en Tunésie, en Libye, au Maroc et en Hongrie; Raritan en Tunésie; et Keswick en Grèce. On procède actuellement à des essais intensifs et à une vive promotion de nouvelles variétés canadiennes dont, entre autres, les suivantes: Acadia Russet, Jemseg, Belleisle, Rideau, Batoche, Shepody, Caribé et Nipigon.

Profil de Variété - Monona

La variété de croustilles Monona, l'une des plus demandées au Canada et aux États-Unis, connaît une popularité grandissante au Nouveau-Brunswick. En effet, cette variété s'est gagnée la faveur de nombreux producteurs pour la transformation par son adaptabilité à diverses conditions climatiques, pratiques culturales ou qualités de sol et par l'excellente qualité des croustilles qu'elle produit.

Obtenue par la firme texane Frito-Lay Inc., de Dallas, la Monona a été sélectionnée dans le Maine à partir d'un croisement entre la Katahdin autofécondée et la Chippewa autofécondée. Elle est disponible depuis 1964.

De couleur chamois, ses tubercules à chair blanche de forme oblongue à ovale ont des yeux superficiels à mi-enfoncés. Elle parvient à maturité à la mi-saison et ses plants ont un port moyennement étalé.

De rendement et de densité spécifique moyens, elle produira des croustilles de couleur claire après avoir été entreposée à 42°F pendant plusieurs mois. Elle ne requiert que deux semaines de pré-conditionnement après un entreposage à 38°F.

Résistante au virus Y (mosaique rugueuse) et au virus A (mosaique bénigne), la Monona affiche de plus une bonne résistance à la verticilliose. Elle s'entrepose bien et connaît un repos végétatif de courte durée.

L'adaptabilité, la résistance aux maladies et la qualité des croustilles de la Monona en font l'une des variétés de croustilles les plus en demande en Amérique de Nord.
